PROFESSIONAL SUMMARY

MSc Artificial Intelligence graduate (Dublin Business School, 2026) with a dual-master's background in Computer Applications and AI. Built production-grade NLP, LLM, RAG, and knowledge-graph systems end-to-end: an LLM observability platform on Azure Container Apps, a GraphRAG clinical decision support system on 50,000+ MIMIC-IV records, and an AI inbox triage system that won a competitive hiring hackathon (GiveAGrad x Lette AI, 2026). Fluent across the full ML lifecycle — embedding pipelines, vector search, FastAPI backends, Docker, and cloud deployment. Actively seeking junior AI/NLP/ML engineering or data science roles in the Irish market.

EDUCATION

MSc Artificial Intelligence — Dublin Business School Sept 2025 – June 2026 | Dublin, Ireland

- Dissertation: *GraphRAG for Clinical Decision Support* — BioClinicalBERT, FAISS, Neo4j, MIMIC-IV; evaluated on Hit@5, Precision@5, BERTScore F1, ROUGE-L.
- Modules: Advanced NLP, Deep Reinforcement Learning, Cognitive & Ethical AI, Cloud Computing.
- Built MiniBioClinicalBERT in Julia (Flux.jl): positional encodings, multi-head attention, transformer blocks, cross-validation.
- Custom Gymnasium RL environment (RealisticEREnv + Pygame); benchmarked Dueling DQN vs Baseline DQN.

MCA — Master of Computer Applications — Amity University 2022 – 2024 | India

- Advanced software engineering, data structures, algorithms, and databases; delivered full-stack and data-driven projects in Python, Java, and SQL.

KEY PROJECTS

LLM Trace & Cost Studio — Personal Build 2025 – 2026 | Azure / Docker / FastAPI

- Self-hosted LLM observability platform (LangSmith-lite): FastAPI backend, Streamlit dashboard, SQLite store, Docker Compose; deployed to Azure Container Apps.
- Captured per-request latency, token usage, cost tracking, and trace metadata; built deterministic chunk-ID mapping and embedding-drift mitigation.
- Stack: Python, FastAPI, Streamlit, Docker, Azure Container Apps, LangChain, OpenAI API, SQLite.

GraphRAG Clinical Decision Support — MSc Dissertation 2025 – 2026 | NLP / Knowledge Graph / RAG

- Three-tier retrieval over 50,000+ MIMIC-IV discharge summaries: FAISS dense retrieval + Neo4j knowledge graph; MongoDB as primary store.
- Fine-tuned BioClinicalBERT for clinical entities; structured notes with regex pipelines (HPI, PMH, labs, meds); enriched with ICD-10/ICD-9 codes.
- Stack: Python, BioClinicalBERT, FAISS, Neo4j, MongoDB, LangChain, HuggingFace Transformers, Docker.

Lette Inbox Copilot Hackathon Winner — GiveAGrad x Lette AI 2026 | LLM / RAG / Streamlit

- Won Lette AI track (GiveAGrad 2026); built three-tier property-management inbox triage under competition conditions — auto-resolve, AI-draft, and human-escalation tiers.
- Real-time Streamlit dashboard with confidence scores and routing logic; received direct outreach from Lette co-founder post-event.
- Stack: Python, LangChain, OpenAI API, FAISS, Streamlit — [github.com/KashishhKhann/lette-inbox-copilot](#)

TECHNICAL SKILLS

Languages	Python, Julia, SQL, Bash, JavaScript (basic)
LLM / GenAI	LangChain, LlamaIndex, OpenAI API, HuggingFace Transformers, Prompt Engineering, RAG Pipelines, Fine-tuning (LoRA / PEFT)
NLP	BERT, BioClinicalBERT, NLTK, spaCy, TextBlob, VADER, Med7, Sentence Transformers
ML / DL	PyTorch, TensorFlow (basic), Scikit-learn, Flux.jl, Lux.jl
Vector / KG	FAISS, ChromaDB, Neo4j (Cypher), NetworkX
Databases	MongoDB, PostgreSQL, SQLite
MLOps / Infra	Docker, FastAPI, Streamlit, Azure Container Apps, GCP (Foundations cert.), MLflow (basic)
Data Eng.	Pandas, NumPy, Scrapy, PySpark (basic), Matplotlib, Seaborn
Dev Tools	Git, GitHub, VS Code, Jupyter, CI/CD (basic)

CERTIFICATIONS

Google Cloud Computing Foundations Certificate	Google	Dec 2023
Software Engineering Job Simulation	Electronic Arts / Forage	Apr 2026
Automation Pro I	Workato	Mar 2024
Responsive Web Design	freeCodeCamp	Nov 2023

ACHIEVEMENTS

- Hackathon Winner** — GiveAGrad x Lette AI (2026): selected as winning entry; received direct outreach from co-founder regarding open roles.
- Dual Master's Degrees** — MSc AI (2026) + MCA (2024); two postgraduate qualifications in computing and artificial intelligence.
- Authored an 18-paper cognitive and ethical AI literature review; formal academic critique of the Med7 clinical NLP system.
